However, if that is not an option: Change the file extension from .rar to .zip. Add the RAR's extension .rar to the existing .zip. The Windows 7 built-in archiver will then assume that .rar is the filetype of the .zip archive. This way, when you unzip it, you will end up with two archives: the new .zip archive and the .rar archive. The Windows 7 built-in archiver will consider the latter to be a secondary archive. Sentinel lymph node biopsy for staging of cancer of the vulva in patients who have a negative groin dissection. To evaluate the validity of sentinel lymph node biopsy (SLNB) for carcinoma of the vulva. Retrospective study. University hospital in the Netherlands. 36 patients with carcinoma of the vulva with clinically negative groin nodes who had had SLNB before groin dissection. 1.5-cm punch biopsy of the clinically node-negative vulva was performed together with peritumoral lymphatic mapping with isosulfan blue dye and radioactive tracer. Detection rate and false-negative rate of sentinel lymph node biopsy. Sentinel lymph node biopsy was technically successful in all patients. The sensitivity, specificity, and negative predictive value were 0.93 (95% CI, 0.79 to 0.98), 0.83 (CI, 0.64 to 0.94), and 0.99 (CI, 0.95 to 1.00), respectively. Three patients had histologically positive nodes, and 1 had a false-negative SLNB. Histologic confirmation of SLNB was made during a second operation. Sentinel lymph node biopsy is a valid method for staging of patients with carcinoma of the vulva. The false-negative rate is no higher than with a standard inguinofemoral dissection. Earlier today, the Wikimedia Foundation was caught up in a minor scandal over the conspiracy-laden claims about burning Qurans and Obama's relationship with radical Islam. This all comes as the Wikimedia Foundation, the nonprofit behind Wikipedia and its sister projects, is in the middle of a major transition. That includes moving to a new office — and you can see why it needs to do that after all the fire-breathing they got

The sub() method returns all elements within a string starting at the specified position. The first parameter is the string you want to inspect. In your case, it would be the numbers in "klomanager deluxe vollversion free download". The second parameter is the position you want to start at, e.g. 5 (in "klomanager deluxe vollversion free download" the fifth number is 5). Try this: sub("://", "", "klomanager deluxe vollversion free download", 5) Output: It extracts all the numbers starting at position 5 from "klomanager deluxe vollversion free download" without including the first colon :. Q: returned array not always contains the exact element I have an array : And I have an element which match those array : I thought an array contains the object which includes in it. But here is the returned array : The first returned array does not contain the object I entered but the second returned array contains the object I entered. Do you know how to do that? A: You can use "===" operator instead of "==". The == operator checks to see if the values are equal, not the same object.
